Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of a patent on any one of the applications, referred to below, may at any time within four months of the date of this *Gazette of India*, give notice at the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Manager of Publications, Civil Lines, Delhi, and also on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta, in due

course. The price of each specification is Re. 1 (postage extra if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of the specifications as shown in the following list.

If required typed copies of the specifications together with copies of drawings, if any, can be supplied by the Patent Office, on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under section 78-A of the Act.

82326. The Teleregister Corporation. Improvements in or relating to communication and posting systems. *Information is stored in a record board, a sequencing apparatus causing the information stores to be displayed in a serial order on a display board having indicating devices assignable to different items.*

82341. Warwick Chemical Company. Quarternary ammonium compounds and impregnation of textile materials therewith. *Strongly heating stearamide chloromethylating the product and reacting with pyridine.*

82427. Dominion Tar and Chemical Company, Limited. Production of styrenes and other mononuclear products. *Passing heated asymmetric diaryl substituted paraffin or its nuclear substituted derivatives having two carbons in paraffin chain through catalyst.*

82558. United Aircraft Corporation. Improvements in or relating to apparatus and method for charging an internal combustion engine. *Separate air flow, fuel flow and combustion modifying ingredient flow devices and means for regulating each by another.*

34553. S. C. Caddy. Improvements in or relating to pruning or like tools. *Pruning tool with pivotally connected superposed cutting blades, one of the shank, being off set to lie in the plane of the other shank.*

82655. Standard Telephones and Cables Limited. Improvements relating to multi-channel electrical pulse communication systems. (26th May 1944). *Comprises a distributor rendering the channel cyclically operative, means for adding concurrent pulses, means for applying the addition resultant wave and intelligence wave to pulse generator to produce time-modulated pulses.*

82775. Electric and Musical Industries Limited. Improvements in or relating to aerials for radiating or receiving electromagnetic waves in a wide range of frequencies. (2nd May 1944). *Comprising an aerial conductor having effectively a large area and provided with series capacities at intervals along length.*

82861. The Indian Standard Metal Co., Ltd., and A. Schwarz. A process of and an apparatus for separation of one or more metals such as zinc, copper, tin, lead or the like from their alloys. *Stirring molten by high or low frequency current, and separation of metal constituents by blowing air, steam or gases alone or combined with salt mixtures.*

34204. W. A. Williams. Improvements in or relating to the driving gear of multi-cylinder reciprocating-piston engines. *Carriage device connecting the crank pin with the cam track.*

84210. S. G. Bedekar and Dr. K. Venkataraman. Improvements in or relating to anthraquinone acid dye-stuffs. *Reacting 2 : 4-dichloro-1-amino anthraquinone with organic bases and sulphonating the product.*

84380. S. L. Mukherjee. An improved process for the manufacture of 5-chloro-7-iodo-8-hydroxy-quinoline or an additive compound thereof. *Reacting 8-hydroxy quinoline with a reagent prepared by passing chlorine into iodine in hydrochloric acid and then decomposing the additive compound.*

34741. Koppers Company, Inc. Improvements in or relating to coking process. *In high temperature coking process, use of a stratum of solid fuel of less bulk density to counter the high expansion pressures experienced with expanding coals and thereby increase the coking rate.*

34758. The Tata Iron and Steel Co., Ltd. Improvements relating to the manufacture of alloy steels in the basic electric arc furnace. *Use of meta-silicate slag before the addition of ferro-alloys.*

84936. E. P. Elston. Improvements connected with garment like hangers. *Supporting member formed with*

a tubular part a member rotatably mounted in the tubular part—a suspension hook mounted in the rotatable member and a pair arms.

35005. The Firestone Tire & Rubber Company. Improvements in or relating to manufacture of films for wrapping and other purposes. *Casting upon a support a mixed latex, contains polymer and copolymer of vinyl chloride and butadiene-acrylonitrile about 50 to 300 parts by weight.*

35146. Bescol (Electric) Limited and C. B. Ananable. Improvements in electric immersion heaters. *Housing of bimetallic switch connected to the socket at one end and to the heating element casing at the other end.*

35195. Ciba Limited. Piperidylketones and process of making same. *A metalloorganic compound is caused to act on a 4-aryl-piperidine-(4)-carboxylic acid ester.*

35289. R. A. W. Tillman and B. V. Orre. A method of prevention of air leaks and preservation of the inner tubes for pneumatic tyres and an agent for this purpose. *Introducing an irresolubly coagulable hydrosol, containing deformable, elastic material and by addition of stabilizing agents.*

Amendment Proceedings

Notice is hereby given under Section 17 of the Indian Patents & Designs Act, 1911, that A. H. Hunt Limited, a British Company Fixed Condenser Makers, of Bendon Valley, Garratt Lane, Wandsworth, London, S.W. 18, England, seek leave to amend their specification in respect of patent No. 30277. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette give notice of his intention to do so in the prescribed form (Form 6 of the Indian Patents & Designs Rules, 1933) at the Patent Office, 214, Lower Circular Road, Calcutta.
